

# AVON CALF STARTER PELLET.

Avon calf starter pellets 19% are a high protein pellet with high palatability. A well balanced formulation of energy and protein to satisfy the needs of young growing calves while still receiving milk. Contains a calf meal pre-mix with a wide range of vitamins and minerals to enhance growth and performance. Anti-oxidant, mineral oil, molasweet and bovatec RA009679 for control of coccidiosis. Selected from maize and maize co-product. Canola meal. Sugars and vegetable oil.

✓	STARCH DM	31.1%

Available in 25kg Paper Bags.  
Available in 1000kg Bulk Bags.  
Available in Bulk Truck Loads.

## FEEDING RECOMMENDATIONS.

Avon calf starter pellets can be offered to calves from day 4 to support milk or milk replacer. When calves are eating 1kg of pellets for three consecutive days or more, then they can be weaned from milk.

Provide high-quality pasture with very good fibre source. Allow access to fresh drinking water.
