Avon Poultry layer 17% is a premium balanced pellet feed for optimum bird growth and health, plus best egg production performance.

Pellets are made from non GM maize and maize co-products. They also include corn gluten meal (Avongold) which supports desirable yolk colour, due to high levels of yellow pigment xanthophyll. Also supported with the addition of a specially prepared pre-mix that includes minerals and vitamins to support superior egg quality and strength.

TYPICAL ANALYSIS.

All NZ Starch Stock Feed Products are non GM and PKE Free.

✓	DM	89%

✓	PROTEIN	17%
✓	STARCH DM	30.5%

Available in 25kg Paper Bags.
Available in 1000kg Bulk Bags.
Available in Bulk Truck Loads.

FEEDING RECOMMENDATIONS.

Avon Poultry layer pellets can be offered to laying chickens from week 15 at a rate of 115 to 130 grams per bird per day. It is a complete feed, but hens can also be provided with kitchen scraps to provide additional interest for the birds.

Always allow bird's access to fresh drinking water.
